

HARMONY ENHANCED MC

HIGH POWER MULTI CARRIER PACKET MICROWAVE

DELIVERING THE LOWEST COST PER BIT OVER MICROWAVE

This high-capacity packet microwave radio builds upon the Harmony Enhanced family by delivering a multi-carrier system, doubling the capacity available in a single Outdoor Unit (qa). Since the radio and modem are integrated into a single, highly-compact ODU, Harmony Enhanced^{MC} is a zero-footprint solution - eliminating rack congestion and minimizing collocation space. The Ultra High Transmit Power increases the overall system gain and allows for deployment of smaller dishes, higher order modulations, or increased link availability.

Using DragonWave's unique Bandwidth Accelerator+ technology, wide channel support and 2048 Quadrature Amplitude Modulation (QAM), the Harmony Enhanced^{MC} provides exceptional spectral efficiency. Spectral efficiency runs up to 2.1 gigabits (Gbps) in a single radio and up to 4.2 Gbps on a single antenna using two ODUs with L1 aggregation.

The Harmony Enhanced.^{MC} delivers significant cost-effective lifecycle services for consumers. These services include unmatched capacity and system gain, simple installation and operation, and sophisticated remote management capacity.

SOLUTION HIGHLIGHTS

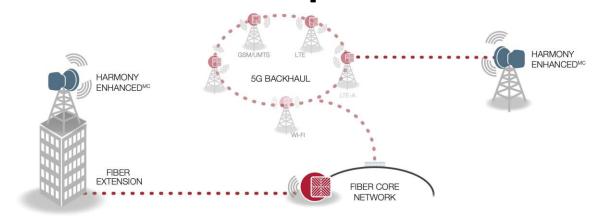

- · Zero footprint, fully integrated all-outdoor unit
- Ultra High Power radio option with up to 34 dBm of transmit power

DragonWave

- Single Radio XPIC configuration
- Wide channel support up to 80 MHz
- Up to 2048QAM modulation support
- Service aware Hitless Automatic Adaptive Modulation (HAAM)
- · Pay-as-you-grow with automatic remote scalability
- Multi-port capability including an integrated 10Gb Ethernet
 port
- Advanced QoS support with 8 levels of prioritization
- Intuitive EMS with LinkView
- · Lowest total cost of ownership solution

KEY APPLICATIONS

- Mobile Backhaul
- Leased Line Replacement
- Last Mile Fiber Extension
- Private and Enterprise Networks

NetViewer Network Management
